Exhibit Shown or Demonstrated: Yes No

If Yes, provide a brief description:

Part I.

Rejection(s) discussed:

Claims discussed:

Attached claims 19 and 21

Prior art documents discussed:

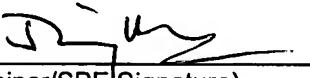

Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

Applicants' representative agreed to amend independent claims 19 and 21 as attached hereto, in order to clarify the claimed invention. The amendments to these claims are provided in the attached Examiner's Amendment.

Part III.

It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.
 It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

(Examiner/SPE Signature)

(Applicant/Applicant's Representative Signature – if appropriate)

19. (Previously Presented) A window unit comprising:
a window frame disposed in a wall of a structure;
a first window housed in a first sash and a second window housed in a second sash, the
first window being movable within the window frame, and the second window being movable
within the window frame and being receivable into the wall adjacent the window frame;
wherein the second window includes a display capable of displaying an image from a
display source, said display and received into said wall when the second window is received
into said wall.

21. (Currently Amended) A window unit comprising:
a window frame disposed in the wall of a structure;
a multi-task window slidably mounted in the window frame;
the multi-task window comprises a display module for receiving a display signal
and a window pane that permits viewing through the wall of the structure; wherein:
the multi-task window is capable of being moved along a horizontal window unit
axis until at least a portion of the multi-task window and at least a portion of said display
module extends beyond the frame perimeter.
